This is a draft...

Over the past year, since doing the Superfund work, I have had the pleasure of working with folks I worked with years ago and 25 years ago with on the Rio Tinto mining.

Creating partnerships is not easy but have supportive agencies who envision some of the same work. They have pulled their expertise together for Walker River.

It means alot to me personally but more importantly is the opportunity to capture data where we all know there are gaps.

Its difficult for me to read on my phone but I also would like to see financial support for this project.

Can we continue our talks in this regard? I have been discussing this with Chairman and council, hoping to present at next meeting in October 13, 2016.

Thank you, Cynthia

Good morning Kip,

If you can get it to me as soon as you are able I would like to discuss with EPA our partnership.

Thanks for letting me know.

Hi Cynthia,

Hope things are well. We are wrapping up the initial draft of concept proposal for you. We do need to have our Directors review so I will probably have it to you next Tuesday or Wednesday. Will be talking with you soon.

Kip
